## Headlight: (in red, optional)

- Ch 7. Join last and first st with a slst to form a ring. 3 dc in third st. Slst in fifth st. Bind off.

Sew Cab back side to the large space of the train cab. Sew windows and stuff in. Sew front side, with the red rim on top.

Sew fire box (the chain border) to the steam box door. You can embroider some features like eyes and a smile, if you like.

Stuff and sew the fire box to the base of the train and to the cab front side.

Sew the front fender to the small opening in the front of the train base. Sew to the steam box the chimney, the headlight and the bell on top. The headlight large part must be on top, the chain part stitched to the front door and you can embroider in white the glass of the lamp.

Sew the big wheels to the cab and the small wheels to the base of the train. Also, you can add a chain line in red in these wheels.

To finish all, you can embroider a name to the sides of the steam box or a line in red. Enjoy!
